# Domestic Broadcasting Survey April 2016

18<sup>th</sup> Edition

(including Tropical Bands Survey 44<sup>th</sup> Edition).

An exclusive publication from the worldwide

**Danish ShortWave Club International**

DENMARK

[www.dswci.org](http://www.dswci.org)

Compiled by Anker Petersen, 31<sup>st</sup> March, 2016. © DSWCI Copyright.

Once again the 59 years old DSWCI is publishing its annual, completely updated Domestic Broadcasting Survey (DBS) covering the whole shortwave spectrum, including the tropical bands. **Part 1** (page 3) is also the 44<sup>th</sup> annual edition of the Tropical Bands Survey (TBS) covering all active broadcasting stations in the range 2300-5700 kHz. **Part 2** (page 7) covers the Domestic stations on international shortwave bands above 5700 kHz broadcasting to a domestic audience.

This survey is based upon many official sources and DX-bulletins. In order to make the DBS reliable, each station frequency has been confirmed on the air by our own monitors around the world. Depending on this worldwide monitoring effort throughout the period April 2015 – March 2016, each entry is classified in the left column using the following codes for their appearance on the particular frequencies:

A: Regular.                      B: Irregular.                      C: Sporadic.                      D: Likely inactive.

Special Events (SE), like national days and cricket test matches of All India Radio, are also included. To make this DBS up-to-date and user-friendly, frequencies which have not been reported heard during the past year are deleted and moved to **Part 3** (page 16). Active Clandestine stations are only included in **Part 1**. DRM transmissions and pirate broadcasts are not included.

Another useful feature is the column called "Last log" which shows the last month and year before the DBS deadline when the particular station was reported logged by a DX-er somewhere in the world. This is another way of indicating the audibility of the station. In a few cases P P P P P is used at entries which normally broadcast during local daylight only and cannot be heard outside a range of about 1000 km.

Thank you very much to all DX-ers who have provided valuable assistance to the DSWCI to make this publication possible! This has been done in the right DSWCI spirit in order to help DX-ers at other locations. The shortwave broadcasting scene is changing every day and your updates are always welcome to the editor by e-mail: [anker.petersen@mail.dk](mailto:anker.petersen@mail.dk) or to DSWCI, Tavleager 31, DK-2670 Greve, Denmark.

Brazilian states and territories are abbreviated as in the World Radio TV Handbook.

(= (kHz)) : Shared transmitter e.g. day/night.    ☐ : One hour earlier during local Summer (DST).    [☐.....]: Different DST period.

Times are in UTC. Thus "☐ 0300-0400" means that it is broadcast at 0300-0400 UTC during local winter, but at 0200-0300 UTC during local summer. The shift to DST is done on the last Sunday in March in most countries in Europe and Asia and back to normal time on the last Sunday in October. For countries on the southern hemisphere the months of local Summer are different and marked in the DBS like [☐Oct-Feb] for stations in southern Brazil. Chinese stations first shift between winter- and summer schedules around May 01 and Nov. 10.

Muslim stations often have extended schedules during the holy month of Ramadan.

Days of the week are abbreviated with the first two letters and they refer to local time rather than UTC. Months of the year are abbreviated by their first three letters.    Powers are in kiloWatts.    ? means that the power seems to be reduced.

**ITU COUNTRY CODES:** (\*) Schedules may shift one hour during Summer Daylight Saving Time.
