# Domestic Broadcasting Survey April 2022

24th Edition

(including Tropical Bands Survey 50th Edition)

An exclusive publication from the former

**Danish ShortWave Club International**

DENMARK

[www.dswci.org](http://www.dswci.org)

Compiled by Anker Petersen, 31 March 2022. © Copyright.

After the dissolution in December 2016 of the 60 years old DSWCI, I decided to continue editing this annual, completely updated Domestic Broadcasting Survey (DBS) covering the whole shortwave spectrum, including the tropical bands. **Part 1** (page 3) is also the 50th annual edition of the Tropical Bands Survey (TBS) covering all active broadcasting stations in the range 2300-5700 kHz. **Part 2** (page 5) covers the Domestic stations on international shortwave bands above 5700 kHz broadcasting to a domestic audience.

Our first edition of the TBS in June 1973 had 44 pages. The 120 metreband (mb) described 113 stations, including 40 from Indonesia, 5 from Papua New Guinea and 19 from Brazil ! In this the 50<sup>th</sup> edition the 120 mb just covers 2 active stations.

This survey is based upon many official sources and DX-bulletins, including the last WRTH. In order to make the DBS reliable, each station frequency has been confirmed on the air by monitors around the world, including the use of remote Kiwi SDR receivers. Depending on this worldwide monitoring effort throughout the period April 2021 – March 2022 each entry is classified in the left column (X) using the following codes for their appearance on the particular frequencies:

A: Regular                      B: Irregular                      C: Sporadic                      D: Likely inactive

To make this DBS up-to-date and user-friendly, frequencies which have not been reported heard during the past year are deleted and moved to **Part 3** (page 12) . Active International stations and Clandestine stations are only included in **Part 1**. DRM transmissions and pirate broadcasts are not included.

Another useful feature is the column called "Last log" which shows the last month and year before the DBS deadline, when the particular station was reported logged by a DX-er somewhere in the world. This is another way of indicating the audibility of the station. In a few cases P P P P P is used at entries which normally broadcast during local daylight only and cannot be heard outside a range of about 1000 km.

Thank you very much to all DX-ers who have provided valuable assistance to me to make this publication possible! The shortwave broadcasting scene is changing every day and your updates are always welcome to the editor by e-mail: [anker.petersen@mail.dk](mailto:anker.petersen@mail.dk) .  
**If you wish me to continue editing the DBS, please confirm this to me by e-mail.**

## **ABBREVIATIONS USED:**

A: Arabic	F.Pl.: Future Plans	nx: news	sl: slogan(s)
alt: alternative	fq: frequency	occ: occasional(ly)	SS: Saturday/Sunday

ex: formerly	MF: Monday-Friday	Ru: Russian	
exc.: except	n: nominal frequency	S: Spanish	
F: French	Nat: National	Sce: Service	

Brazilian states and territories are abbreviated as in the World Radio TV Handbook.

(=(kHz)) : Shared transmitter e.g. day/night    □ : One hour earlier during local Summer (DST).    [□.....]: Different DST period.

Times are in UTC. Thus "□ 0300-0400" means that it is broadcast at 0300-0400 UTC during local winter, but at 0200-0300 UTC during local summer. The shift to DST is done on the last Sunday in March in most countries in Europe and Asia and back to normal time on the last Sunday in October. Chinese stations first shift between winter- and summer schedules around May 01 and Nov. 10.

Muslim stations often have extended schedules during the holy month of Ramadan.

Days of the week are abbreviated with the first two letters and they refer to local time rather than UTC. Months of the year are abbreviated by their first three letters.    Powers are in Kilowatts.    ? means that the power seems to be reduced.

**ITU COUNTRY CODES** (\*) Schedules may shift one hour during Summer Daylight Saving Time.
