

Domestic Broadcasting Survey April 2024

26th Edition

(including Tropical Bands Survey 52nd Edition)

An exclusive publication from the former

Danish ShortWave Club International

DENMARK

www.dswci.org

Compiled by Anker Petersen, 22 March 2024 Copyright.

After the dissolution in December 2016 of the 60 years old DSWCI, I decided to continue editing this annual, completely updated Domestic Broadcasting Survey (DBS) covering the whole shortwave spectrum, including the tropical bands. **Part 1** (page 2) is also the 52nd annual edition of the Tropical Bands Survey (TBS) covering all active broadcasting stations in the range 2300-5700 kHz.

Part 2 (page 5) covers the Domestic stations on international shortwave bands above 5700 kHz broadcasting to a domestic audience.

This survey is based upon many official sources and DX-bulletins. In order to make the DBS reliable, each station frequency has been confirmed on the air by monitors around the world, including the use of remote SDR receivers. Depending on this worldwide effort throughout the period April 2023-March 2024 each entry is classified in the left column (X) using the following codes for their appearance on the particular frequencies:

A: Regular

B: Irregular

C: Sporadic

D: Likely inactive

To make this DBS up-to-date and user-friendly, frequencies which have not been reported heard during the past year are deleted and moved to **Part 3** (page 12). Active International stations and Clandestine stations are only included in **Part 1**. DRM transmissions and pirate broadcasts are not included.

Another useful feature is the column called "Last log" which shows the last month and year before the DBS deadline, when the particular station was reported logged by a DX-er somewhere in the world.

Thank you very much to all DX-ers who have provided valuable assistance to me to make this publication possible! The shortwave broadcasting scene is changing every day and your updates are always welcome to my **new** e-mail: ankerpetersen972@gmail.com. **If you wish me to continue editing the DBS, please confirm this to me by e-mail.**

Brazilian states and territories are abbreviated as in the World Radio TV Handbook.

(=(kHz)) : Shared transmitter e.g. day/night ⌘ : One hour earlier during local Summer (DST) (⌘...): Different DST period.

Times are in UTC. Thus “Ꝁ 0300-0400” means that it is broadcast at 0300-0400 UTC during local winter, but at 0200-0300 UTC during local summer. The shift to DST is done on the last Sunday in March in most countries in Europe and Asia and back to normal time on the last Sunday in November. Chinese stations first shift between winter- and summer schedules around May 01 and Nov 10. Muslim stations often have extended schedules during the holy month of Ramadan.

Days of the week are abbreviated with the first two letters and the refer to local time rather than UTC. Months of the year are abbreviated by their first three letters. Powers are in Kilowatts. ? means that the power seems to be reduced.

ITU COUNTRY CODES

(*) Schedules may shift one hour during Summer Daylight Saving Time.
